Tax maps for the Township need to be updated every year as per state statute. This is normally accomplished by the Engineering Department. Some of the changes that need to be made are too time consuming for the Engineering Department to complete. An outside firm needs to be hired to complete the updates as per state statute. The estimates are between \$9,000 & \$12,000. This line item also includes fees for assessment assistance for properties which this office has limited data to value. Account #201 - Budget Appropriation

This budget line is a "non-spending" line item. It is required by law under state statute 40A:4-40. This law states the following:

There shall be included in each budget an appropriation for "reserve for uncollected taxes" sufficient in amount so that the anticipated cash receipts for the fiscal year shall at least equal the sum of the following items, each of which is hereinafter referred to as a "lawful yearly expenditure":

- a. The total of all current budget appropriations (except for reserve for uncollected taxes);
- b. The amounts due or to become due for school, county, State, local and special district taxes prior to the end of the fiscal year; and
- c. The amounts of any other anticipated current expenditures for the fiscal year.

The purpose of this appropriation is to account for the taxes that will NOT be collected. The township must pay the taxes levied to the board of education and the county for the full amount of taxes levied. The reserve for uncollected taxes is a non-spendable item which is placed on the appropriation side of the budget causing the revenue side of the budget, the property tax levy, to be increased. Therefore sufficient cash is generated to meet expenditures and the overall tax levy. Without this appropriation, the township could be in a position of having an obligation to the Schools and the County without sufficient funds to meet this obligation.
