

## New Jersey Natural Gas (NJNG) Update:

September 1, 2016 – Update-

The gas main in Phase 3 of White Meadow Lake has been completed with the exception of Indian Spring Condo's. We are waiting for the propane company to install temporary above ground propane tanks and dismantle their underground piping system before we can proceed with our gas installation behind the buildings. Nevertheless, we will be finished with the service laterals on Ronald Ave today. We will start the service installations on Ellen Drive today or tomorrow. Here is the remaining schedule for service installations in street order:

Pawnee

Wichita

Norman

Oakland

Omaha

NJNG will be replacing gas lines according to the ["Safe" Program](#) approved by the Board of Public Utilities in late July on the following streets:

- Mountain Road
- Gerald Place
- Stephen Place
- Robert Street.

NJNG will notify residents on the above streets when they will be starting.

In order to help keep you notified of road closures for this project and other emergencies, we recommend that residents sign up for the Nixle Notification System, to receive the most updated information. Residents can sign up for Nixle by going to the Township [website](#).

Residents can still hook up for natural gas by calling NJNG representative Brian Klinger at 973-586-4691. Permits are required by the Township of Rockaway when a resident is switching to natural gas.

NJNG will be starting section IV. [Letters to homeowners](#) have gone out.
