

Rockaway Township COVID-19

Updated 4:30pm, March 26, 2020

There are currently 10 positive cases of COVID-19 in Rockaway Township

Cases:

Rockaway Township:	10 (as of 6:00pm, 3-26-20)
Male	6
Female	4
Mean (average) Age	45.7 years
Median Age	44 years
Range	36 – 57
Morris County:	315 (as of 2pm, 3-25-20)
New Jersey:	6,876 (as of 2pm, 3-25-20)
United States:	68,440 (as of 4pm, 3-25-20)

Rockaway Township health officials are following all appropriate NJ Department of Health (NJDOH) and Centers for Disease Control and Prevention (CDC) protocols in conducting efficient and comprehensive follow up. Individuals who have tested positive for COVID-19 have been contacted by Rockaway Township’s Division of Health, are isolated from the public per federal/state guidelines and are being monitored in accordance with NJDOH and CDC requirements to ensure compliance with all protocols in protecting our community.

Please be advised that per established guidelines, household contacts and close contacts of individuals who test positive for COVID-19 are contacted by the Rockaway Township’s Division of Health, are asked for information, and are furnished with instructions for quarantine and monitoring.

Please note: Federal and state law strictly prohibits the release to the public of private health information of any individual, including the name, address or any other identifying information specific to those who test positive for COVID-19. Rockaway Township maintains compliance with all applicable local, county, state and federal regulations.

Persons who have tested positive for COVID-19 are isolated from the public. Persons who may have COVID-19 but do not yet have symptoms are *not* under isolation and still may move freely in public, in accordance with the Governor’s applicable executive orders. Therefore, for your protection and for the protection of those around you, please:

- Continue to stay home
- Comply with social distancing measures
- Wash hands frequently
- Cough/sneeze into a tissue or your sleeve instead of hands
- Self-monitor for symptom
- If you experience symptoms (fever of 100.4°F, cough, shortness of breath), please call your healthcare provider for guidance

Inasmuch as current data is available, Rockaway Township will continue to update the public regularly regarding the status of cases within the Township, Morris County, New Jersey and the United States.

Definitions:

Household contact: *Defined as a person who lives in the same household.*

Close contact: *Defined as a person spending a prolonged period of time within approximately six feet (6') of a confirmed case (i.e., caring for, living with, visiting or sharing a healthcare waiting area or room) or having direct contact with infectious secretions of a confirmed case (such as being coughed or sneezed on), in the time period from three days (72 hours) prior to onset of a case's symptoms until the beginning of isolation of the case.*

Casual contacts: *Defined as other persons who may have had casual contact with someone who has tested positive for COVID-19 (i.e., sharing the same indoor environment, like a lobby or office, for a prolonged period of time; occupying the same room briefly). Please note that casual contacts will not be contacted by the Division of Health and do not need to be placed under quarantine. These persons should continue to follow all applicable orders (from State, Morris County and/or municipal government), comply with social distancing measures, maintain hand hygiene and respiratory etiquette, and self-monitor for symptoms (fever of 100.4°F or higher, cough and/or shortness of breath).*
